SCHEDULE OF AVERAGE PERCENTAGES.

Section 311 of the Revenue Act of 1918 provides that a corporation which was not in existence during the whole of at least one calendar year during the prewar period, and therefore received no income during the prewar period, shall be allowed a specific exemption of \$3,000 and—

An amount equal to the same percentage of the invested capital of the taxpayer for the taxable year as the average percentage of net income to invested capital, for the prewar period, of corporations engaged in trade or business of the same general class as that conducted by the taxpayer, but such amount shall in no case be less than 10 per centum of the invested capital of the taxpayer for the taxable year. Such average percentage shall be determined by the commissioner on the basis of data contained in returns made under Title II of the Revenue Act of 1917, and the average known as the median shall be used.

In pursuance of this requirement of the law, the accompanying table has been compiled and will be used in complying with section 250(b), which provides:

As soon as practicable after the return is filed, the commissioner shall examine it. If it then appears that the correct amount of the tax is greater or less than that shown in the return, the installments shall be recomputed. If the amount already paid exceeds that which should have been paid on the basis of the installments as recomputed, the excess so paid shall be credited against the subsequent installments; and if the amount already paid exceeds the correct amount of the tax, the excess shall be credited or refunded to the taxpayer in accordance with the provisions of section 252.

Inasmuch as the examination of all returns filed will not be completed by the due date of the last installment of 1918 taxes, it is suggested that the taxpayers entitled to credit based on the appropriate average percentage shown in the accompanying tables may recompute their tax, using a war profits credit based on such average percentage, and file claim for abatement for as much of the last installment of the outstanding assessment as the total tax assessed exceeds the tax so recomputed. In any case where the amount already paid exceeds the amount due, with the benefit of the average percentage, claim for refund should also be filed on Form 46.
